

Our classroom through the eyes of Mahdi.

Our students drawings...

During these difficult times it's very important for our team to be able to interact with the students of our school. That's why we decided to create this newspaper in order to have a platform for our students to express their feelings.

Mahdi's thoughts about his teacher.

My dear teacher, you are my favourite with your teachings you brought hope and light on my way. You are like a white flower and you came from far away to help us. You are like a beacon of light that I ran towards when I saw you.

“Even if I’m young I have a lot of hopes and dreams for the future. When I grow up I would like to be a police officer.

These words of Mahdi are roughly translated...

Sipel, 8 years old “ She dedicates this picture to her mom.”

Paria , 8 years old “I miss Praksis school, my teachers and my classmates so I did a drawing about a dolphin that rises from the sea and reaches the sky! ”

Our students attempt to stay active.

In this picture we see Yusuf’s attempt to write the months in English during the difficult times he’s experiencing, this shows how much he misses Praksis school and the will he has to learn.
